Re-Building Global Standards in Reporting Ecosystem

9 November, 14:00 - 14:45

Location: Blue Zone, Pavilion of TÜRKİYE

At COP26, the International Financial Reporting Standards Board (IFRS) announced the establishment of the “International Sustainability Standards Board (ISSB)” to develop comprehensive global reporting standards to put sustainability reporting on the same basis as financial. The Paris Climate Agreement, EU Taxonomy and EU Green Deal Agreement has also triggered this announcement. The transition to a single reporting system, on which integrated reporting will be based, makes it inevitable for every company/institution to take immediate action. As the Integrated Reporting Association of Turkey, we also take an active part in this transformation process and continue to work effectively on national/international platforms. In this panel, it is planning to discuss the recent developments about the reporting standards, ESG issues, IFRS consolidation and corporate reporting ecosystems, as well as the future strategies/actions for Turkey and emerging countries. The panel will also discuss the impact of reporting standards on investors’ decision-making and the responsibilities that await companies in corporate reporting.

Moderator & Speaker

Prof. Dr. Güler Aras

Founding Chair, Integrated Reporting Association Turkey (ERTA)

Vikas Aggarwal

ACCA Regional Head of Public Affairs -Europe, Eurasia, the Middle East and the Americas

Head of Climate Finance and Incentives Department, Climate Change Office, Ministry of Environment, Urbanization and Climate Change of Turkey

Mehmet Şirin

Head of Accounting Standards Department, Public Oversight, Accounting and Auditing Standards Authority

Green Transformation in Emerging Economies: Financing Low Carbon Transition and ETS

9 November, 16:00 - 16:45

Location: Blue Zone, Pavilion of TÜRKİYE

After the European Union (EU) announced its future targets for green transformation and made a carbon taxation system mandatory for countries that will trade with EU countries with the “Border Carbon Regulation Mechanism”; the momentum related to climate change policies in countries, having commercial relations with EU, began to change faster than ever before.

In this panel, it is planning to discuss Turkey’s and emerging countries’ adaptation to a low carbon economy, the “EU Green Deal” transition, the “Carbon Border Adjustment Mechanism” and the “Emissions Trading System”. The panel will assess the financing needs/instruments for the low carbon climate resilient transitions, the role of financial actors in this regard, the steps to be taken for the development of a sustainable finance ecosystem and resource-efficient economy, and also the importance of reporting non-financial information in an accurate, holistic and transparent format along with financial data, as one of the important requirements in this transition.
